

Construction Begins on the 183 North Mobility Project

The Central Texas Regional Mobility Authority (Mobility Authority) is pleased to announce the official kickoff of the 183 North Mobility Project. Work begins soon on the nine-mile stretch of US 183 between SH 45 North and MoPac. The 183 North Mobility Project aims to improve mobility, reduce congestion, and provide more reliable travel times for transit and emergency responders along this portion of US 183.

To address issues on and off the roadway, the project includes the construction of two express lanes in each direction and the addition of a general-purpose lane to bring the number of non-tolled lanes to four in each direction in addition to other improvements.

[About the Project](#)

183 North Mobility Project Groundbuilding

The Mobility Authority shifted away from a traditional groundbreaking for the 183 North Mobility Project to embrace the heroes that nurture our community and help it thrive. For this event, we acknowledged educators at five local Round Rock ISD schools along the project corridor. These community cultivators were celebrated with a ceremonial tree planting and dedication in their honor. The planting of trees represents a special kind of groundbreaking – one where the soil is turned to sow seeds of community, celebrate those who protect the quality of life for the region and cultivate the improvements that help us grow and move together.

[About the Event](#)

Celebrating Community Cultivators

The Mobility Authority is committed to honoring community cultivators throughout the life of the 183 North Mobility Project and beyond.

What You'll See on the Road

Road crews will start work on the corridor by replacing existing conventional lighting along US 183 between SH 45 North and MoPac with new high mast lighting fixtures. Installing new lighting will address inadequate lighting along the project corridor, increase visibility and improve safety and efficiency.

We're with You Every Step of the Way

Because we place a high priority on customer satisfaction, transparency and trust, the Mobility Authority is committed to being a partner in the community and working proactively with local businesses, commuters and residents through the construction process and beyond.

We will be out in the community as much as possible whether in-person or virtually, to share information, provide prompt communication about construction activities and to be accessible to the general public and business community to hear concerns and help answer any questions.

Giving Back

Earlier this fall, Great Hills Constructors, our Design-Build Contractor, made a donation to support back-to-school supply needs for five area schools.

Meet the Project Team Event #1 - November 4, 2021

Thank you to all who attended the first (virtual) 183 North Mobility Project event this past fall on November 4th, 2021. During the event, we provided detailed updates on the project and held a question-and-answer session with the contractor, Great Hills Constructors and members of the Mobility Authority. The presentation included the construction schedule, improvements and the latest technologies that will be used on the roadway. A video of the event is available if you were unable to attend.

Door-to-Door

In fall of 2021, the community outreach team also began reaching out to businesses along the US 183 corridor in northwest Austin. Our team introduced the project to business owners, managers, and customers on-site at 121 businesses, providing them with a 183 North Mobility Project Fact Sheet, a window sticker and business cards. Watch our outreach to continue in 2022 and throughout the life of the project.

Feel Free to Reach Out

If you are a business owner along the project corridor, a member of the public who has a question for the project team or know of a community event or initiative you would like us to consider getting involved in, please get in touch with us, we're with you every step of the way.
